

SAN ANTONIO, TX

Leading Autism Services Provider

Tenant Advisory

Transwestern's San Antonio team, led by Charlie Weil and 'Licia Salinas, has had the privilege of working with a long-time client dedicated to providing essential services for children and families impacted by autism. Over the years, their partnership has focused on identifying spaces that support their growth, accessibility, and long-term mission.

With rising demand for their services, the client sought to expand its presence in Greater San Antonio. Charlie and 'Licia collaborated with the client's leadership to identify two additional locations, expanding two new service areas to their existing San Antonio location: A 5,476 square foot clinic at 652 N Houston St in New Braunfels, Texas and a 4,000 square foot clinic at 12415 Bandera Rd in Helotes, Texas.

These strategic locations are expected to significantly enhance access to the client's high-quality ABA therapy and support services for families in the community.

"Transwestern has been a true partner in helping us identify spaces that allow us to grow and serve more families."
